

Metal and Engineering qualifications

Metal and engineering qualifications meet the needs of workers performing a broad range of manufacturing and engineering activities. These activities include design, manufacture, assembly, packaging, installation, commissioning, service, maintenance and repair of manufactured and engineered products. This includes typical engineering activities such as steel fabrication, casting, moulding and machining, mechanical and electrical services to more diverse areas such as boat and shipbuilding, jewellery manufacture and watch servicing and repair. The qualifications cover generic to highly specialised skills at many levels.

People with metal and engineering skills also work in areas outside engineering manufacture, such as building and construction, mining and other resources, health services, medical equipment, food technology, retail industry and hospitality.

Qualifications:

- Certificate I in Engineering
- Certificate II in Boating Services
- Certificate II in Engineering
- Certificate II in Engineering – Production Technology
- Certificate III in Engineering – Production Systems
- Certificate III in Engineering – Mechanical Trade
- Certificate III in Engineering – Fabrication Trade
- Certificate III in Engineering – Electrical / Electronic Trade
- Certificate III in Engineering – Technical
- Certificate III in Jewellery Manufacture
- Certificate III in Marine Craft Construction
- Certificate III in Locksmithing
- Certificate III in Boating Services
- Certificate IV in Engineering
- Certificate IV in Boating Services
- Diploma of Engineering – Advanced Trade
- Diploma of Engineering – Technical
- Advanced Diploma of Engineering
