

## ELECTRONIC EQUIPMENT TRADESPERSON

Electronic equipment tradespersons install, calibrate, modify, maintain and repair all manner of electronic equipment and systems including that used for the measurement and control of temperature, pressure and flow in petro-chemical, mining, food processing and many other manufacturing sectors.

Electronic equipment tradespersons also work in instrumentation, radar and sonar, data communications, computer systems, security and alarm systems, business machinery and entertainment systems.

A career as an electronic equipment tradesperson could suit someone who enjoys computers, engineering, electronics and technology, building and repairing things, practical tasks and problem solving. If this sounds like you and if you like industrial arts subjects (and perhaps maths and physics as well), then an electronic equipment trade could be for you.

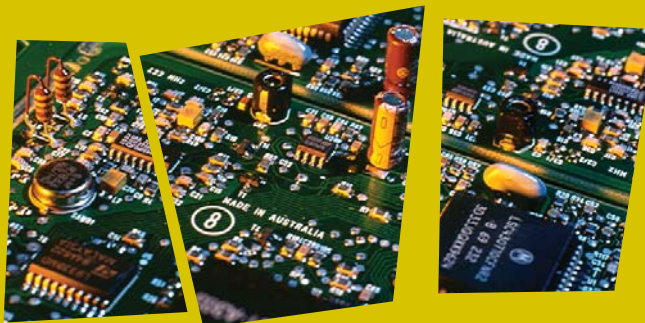

## SO WHERE TO FROM HERE?

Electronic equipment tradespersons are in great demand and therefore often well paid. So if you believe that a trade career in the electronics industry is for you, there is plenty of help and advice out there.
